

Satellogic Accelerates Growth with Leadership Appointments

December 3, 2021

Leadership hires across Corporate Development, Human Resources, Financial Reporting and Sales will further build on industry leading Earth Observation capabilities and geospatial data applications

Charlotte, NC: November 17, 2021 – Satellogic, a leader in sub-meter resolution satellite imagery collection, today announced new key hires, bolstering company leadership and expertise in the Earth Observation space. These senior leaders, united by the vision and inspired by the technology behind it, bring unique expertise to solidify Satellogic's best in class team.

"Since our founding, Satellogic has been driven by our mission to democratize access to geospatial data to help solve the world's most pressing problems," said Emiliano Kargieman, CEO at Satellogic. "These exceptional leadership hires reflect our commitment to delivering on this mission across the business, through our collective ambition, ingenuity, and determination."

Ryan Driver joins Satellogic as VP of Corporate Development. Most recently, Ryan developed strategies and executed on a wide range of initiatives for satellite company, Maxar Technologies. Previously, Ryan was a CPA at KPMG in its M&A/financial due-diligence and audit practices. At Satellogic, Ryan will promote growth through M&A, partnerships, and other organic opportunities, and serve as a Satellogic ambassador within the industry.

Julia Dormaar, VP of People at Satellogic, joins with strong international experience across the entire Human Resources spectrum from both established multinational corporations to highly dynamic start-ups. Julia will work to scale up the organization, streamline HR operations and further build out leadership capabilities to fulfil Satellogic's goals, with a focus preserving core cultural differentiators around pushing the limits, taking ownership and continuous learning, that have defined Satellogic's diverse, determined and ambitious team. Julia previously spent time at Tesla, where she led the EMEA HR team through the Model 3 ramp-up and European market expansion, and Artemis GmbH, a start-up under the Audi brand, focused on the development of premium autonomous electric vehicles, where she and her team built-out the core recruiting and people management foundation.

Dustin Kapsa comes to Satellogic as VP of Accounting and Financial Reporting. Dustin is a CPA and has over 15 years of experience with filings with the Securities and Exchange Commission (SEC) and technical accounting. He most recently served as the Director of Global Accounting Advisory, Global Financial Reporting and Global Consolidations at CDW Corporation in Chicago, IL, during which time he was responsible for its filings with the SEC and the accounting policies for the organization. At Satellogic, Dustin will develop compliance and reporting processes to scale with Satellogic's growth plans as a public company, and will co-lead a project to enhance its existing internal controls around financial reporting.

Brian Lantier joins Satellogic as EVP of Global Sales, and will lead global revenue growth efforts as Satellogic delivers its go-to-market execution and attains a recognized market leadership position.

He brings 23 years of global IT service provider new logo sales and existing client growth leadership experience from such companies as EDS, Computer Science Corporation (DXC), Hewlett Packard, and recently from Unisys, where he led both the Latin America and Europe sales organizations. In addition to revenue growth, Brian will help develop Satellogic's sales culture, sales enablement and process, sales operations, and client account management.

Satellogic continues to build momentum across the business, harnessing global talent and industry defining expertise as the company seeks to remap the entire surface of the Earth daily in high resolution and at an affordable price-point, changing the way satellite data is accessed and used around the world.

About Satellogic

Founded in 2010 by Emiliano Kargieman and Gerardo Richarte, Satellogic is the first vertically integrated geospatial company, driving real outcomes with planetary-scale insights. Satellogic is building the first scalable, fully automated Earth Observation platform with the ability to remap the entire planet at both high-frequency and high-resolution, providing accessible and affordable solutions for customers.

Satellogic's mission is to democratize access to geospatial data through its information platform to help solve the world's most pressing problems including climate change, energy supply, and food security. Using its patented Earth imaging technology, Satellogic unlocks the power of Earth Observation to deliver high-quality, planetary insights at the lowest cost in the industry.

With more than a decade of experience in space, Satellogic has proven technology and a strong track record of delivering satellites to orbit and high-resolution data to customers at the right price point.
