Satellogic Extends Country-Wide Monitoring Agreement with the Government of Albania, Enabling Persistent National Earth Intelligence

January 29, 2026

Extension delivers continuous, high-frequency oversight of Albania's entire territory, establishing a new model for national-scale Earth observation

NEW YORK, Jan. 29, 2026 (GLOBE NEWSWIRE) -- Satellogic, Inc. (NASDAQ: SATL), a vertically integrated geospatial company delivering high-resolution Earth Observation (EO) at unprecedented scale and economics, today announced an extension of its existing agreement with the Government of Albania to continue country-wide, high-frequency satellite monitoring using its NewSat constellation.

The 11-month contract extension builds on a previously signed three-year agreement that provided Albania with dedicated satellite capacity and the naming of two satellites, *Albania-1* and *Albania-2*. Under the extended agreement, Albanian government agencies will continue to receive frequent, high-resolution (50 cm) imagery covering the country's entire territory, enabling persistent oversight and a centralized stream of intelligence across national priorities.

This extension reflects Albania's continued commitment to moving beyond reactive, event-driven tasking toward a persistent state of awareness at a national scale. With dedicated access to Satellogic's fleet, Albania can continuously detect change, identify anomalies, and act with confidence across use cases including illegal construction, deforestation, natural resource management, and disaster and emergency response.

"We are excited to continue our partnership with Albania as they prioritize national-scale monitoring," said **Jeff Kerridge, SVP of Global Sales at Satellogic**. "National governments require continuous oversight, not occasional snapshots. This extension proves that persistent monitoring is now both operationally necessary and economically viable, ensuring no critical change goes unseen."

The Next Evolution of National Intelligence Monitoring

Made possible by Satellogic's vertically integrated constellation and unencumbered capacity, programs of this scope reflect a broader shift toward persistent Earth intelligence across large regions of interest, including entire countries. This evolution signals a new expectation for how governments and industry define availability, frequency, and continuity of geospatial data at national scale.

About Satellogic

Founded in 2010 by Emiliano Kargieman and Gerardo Richarte, Satellogic (NASDAQ: SATL) is a vertically integrated Earth observation company that designs, manufactures, and operates satellite systems, delivering decision-grade insights at scale to government and commercial customers. Through an end-to-end production and operations model, Satellogic provides governments with flexible options across their journey toward sovereign Earth observation. From access to high-frequency imagery and managed space systems to full satellite ownership, to supporting autonomous data availability and long-term technological independence.

This integrated approach enables Satellogic to deploy satellites on predictable timelines and operate with capacity to support persistent coverage across large portfolios of sites. Satellogic enables continuous monitoring and alert-driven workflows that help defense and intelligence agencies, civil governments, and commercial operators move from reactive tasking to proactive decision-making, providing mission-critical data when it is needed.

Forward-Looking Statements

This press release contains "forward-looking statements" within the meaning of the U.S. federal securities laws. The words "anticipate", "believe", "continue", "could", "estimate", "expect", "intends", "may", "might", "plan", "possible", "potential", "predict", "project", "should", "would" and similar expressions may identify forward-looking statements, but the absence of these words does not mean that a statement is not forward-looking. These forward-looking statements are based on Satellogic's current expectations and beliefs concerning future developments and their potential effects on Satellogic. Forward-looking statements are predictions, projections and other statements about future events that are based on current expectations and assumptions and, as a result, are subject to risks and uncertainties. These statements are based on various assumptions, whether or not identified in this press release. These forward-looking statements are provided for illustrative purposes only and are not intended to serve, and must not be relied on by an investor as, a guarantee, an assurance, a prediction or a definitive statement of fact or probability. Actual events and circumstances are difficult or impossible to predict and will differ from assumptions. Many actual events and circumstances are beyond the control of Satellogic. Many factors could cause actual future events to differ materially from the

forward-looking statements in this press release, including but not limited to: (i) our ability to generate revenue as expected, including due to challenges created by macroeconomic concerns, geopolitical uncertainty (e.g., trade relationships), financial market fluctuations and related factors, (ii) our ability to effectively market and sell our EO services and to convert contracted revenues and our pipeline of potential contracts into actual revenues, (iii) risks related to the secured convertible notes, (iv) the potential loss of one or more of our largest customers, (v) the considerable time and expense related to our sales efforts and the length and unpredictability of our sales cycle, (vi) risks and uncertainties associated with defense-related contracts, (vii) risk related to our pricing structure, (viii) our ability to scale production of our satellites as planned, (ix) unforeseen risks, challenges and uncertainties related to our expansion into new business lines, (x) our dependence on third parties, including SpaceX, to transport and launch our satellites into space, (xi) our reliance on third-party vendors and manufacturers to build and provide certain satellite components, products, or services and the inability of these vendors and manufacturers to meet our needs, (xii) our dependence on ground station and cloud-based computing infrastructure operated by third pirates for value-added services, and any errors, disruption, performance problems, or failure in their or our operational infrastructure, (xiii) risk related to certain minimum service requirements in our customer contracts, (xiv) market acceptance of our EO services and our dependence upon our ability to keep pace with the latest technological advances, including those related to artificial intelligence and machine learning, (xv) our ability to identify suitable acquisition candidates or consummate acquisitions on acceptable terms, or our ability to successfully integrate acquisitions, (xvi) competition for EO services, (xvii) challenges with international operations or unexpected changes to the regulatory environment in certain markets, (xviii) unknown defects or errors in our products, (xix) risk related to the capital-intensive nature of our business and our ability to raise adequate capital to finance our business strategies, (xx) uncertainties beyond our control related to the production, launch, commissioning, and/or operation of our satellites and related ground systems, software and analytic technologies, (xxi) the failure of the market for EO services to achieve the growth potential we expect, (xxii) risks related to our satellites and related equipment becoming impaired, (xxiii) risks related to the failure of our satellites to operate as intended, (xxiv) production and launch delays, launch failures, and damage or destruction to our satellites during launch, (xxv) the impact of natural disasters, unusual or prolonged unfavorable weather conditions, epidemic outbreaks, terrorist acts and geopolitical events (including the ongoing conflicts between Russia and Ukraine, in the Gaza Strip and the Red Sea region) on our business and satellite launch schedules and (xxvi) the anticipated benefits of the domestication may not materialize. The foregoing list of factors is not exhaustive. You should carefully consider the foregoing factors and the other risks and uncertainties described in the “Risk Factors” section of Satellogic’s Annual Report on Form 10-K and other documents filed or to be filed by Satellogic from time to time with the Securities and Exchange Commission. These filings identify and address other important risks and uncertainties that could cause actual events and results to differ materially from those contained in the forward-looking statements. Forward-looking statements speak only as of the date they are made. Readers are cautioned not to put undue reliance on forward-looking statements, and Satellogic assumes no obligation and does not intend to update or revise these forward-looking statements, whether as a result of new information, future events, or otherwise. Satellogic can give no assurance that it will achieve its expectations.
