

Satellogic Appoints Jamil Kavar as Senior Vice President, Space Systems

August 13, 2026

Veteran Space and Defense Executive to Join Satellogic's Space Systems Business as Demand for Sovereign Satellite Constellations Accelerates

NEW YORK, Aug. 13, 2026 (GLOBE NEWSWIRE) -- Satellogic, Inc. (NASDAQ: SATL), the infrastructure company for Persistent Global Intelligence, today announced that Jamil Kavar has joined the company as Senior Vice President, Space Systems. In this role, Kavar will join Satellogic's Space Systems sales team, working with governments and commercial partners worldwide to deliver sovereign satellite constellations and mission-critical space infrastructure.

Kavar's appointment comes as governments around the world increasingly seek to own and operate their own satellite capabilities rather than rely solely on tasking-based access to imagery. Satellogic's Space Systems offering, built on the same technology and manufacturing base that powers its own constellation, allows nations and organizations to stand up independent, sovereign Earth Observation capabilities with superior unit economics and at unprecedented speed.

"Jamil brings a rare combination of regional relationships, commercial discipline, and deep technical fluency in space systems and satellite sales," said Emiliano Kargieman, CEO and Co-Founder of Satellogic. "Governments are moving to secure sovereign space capabilities at an increasing pace. Jamil's experience closing complex, high-stakes programs across the Middle East, Europe, and beyond will be instrumental in scaling our Space Systems business to meet that demand."

Kavar joins Satellogic with more than two decades of experience across the aerospace, defense, and space domains, with particular depth in the Middle East and North Africa (MENA) region. He most recently served as Senior Vice President, International Satellite Sales at BlackSky, where he led international satellite sales across space-based intelligence, defense, and space systems. Prior to BlackSky, Kavar spent nearly seven years at ICEYE, where he held a series of progressively senior roles including Vice President, Space Missions, MENA; Head of Space Systems Sales, MENA; Director, Global Sales; and Regional Director, MENA — helping build ICEYE's synthetic aperture radar (SAR) business from the ground up in the region.

Earlier in his career, Kavar served as Business Development Manager for the Defence Business Unit at Wincanton and as Senior Business Development Manager at Prenax Ltd. He also spent 17 years as Director of Business Development at AMAN Management Consultancy Co. Ltd. in Amman, Jordan, and the UK, and founded and led K5 Global Ltd, a business intelligence consultancy. Kavar is based in Dubai, United Arab Emirates.

"Governments and defense organizations are no longer content to simply buy imagery, they want to own the means of production," said Kavar. "Satellogic has built exactly the kind of vertically-integrated, cost-efficient platform that makes sovereign satellite programs achievable for a much broader set of customers. I'm excited to help partners around the world stand up their own space capabilities and to be part of a team that is redefining what's possible in Earth Observation and persistent global intelligence."

About Satellogic

Founded in 2010, Satellogic (NASDAQ: SATL) builds the infrastructure for Persistent Global Intelligence (PGI): continuous, proactive awareness of the places, assets, and activities that matter. The company combines high-cadence satellite collection, best-in-class technology, AI-accelerated workflows, and sovereign-trusted architecture to help customers move from episodic imagery to persistent monitoring programs.

Satellogic serves allied defense and intelligence agencies, civil governments, and commercial markets that need reliable, scalable awareness of change across large portfolios of sites. Customers can begin with discovery, expand into persistent monitoring, and build toward dedicated or sovereign-controlled capacity as their mission requirements grow. Forward-Looking Statements

This press release contains "forward-looking statements" within the meaning of the U.S. federal securities laws. The words "anticipate", "believe", "continue", "could", "estimate", "expect", "intends", "may", "might", "plan", "possible", "potential", "predict", "project", "should", "would" and similar expressions may identify forward-looking statements, but the absence of these words does not mean that a statement is not forward-looking. These forward-looking statements are based on Satellogic's current expectations and beliefs concerning future developments and their potential effects on Satellogic. Forward-looking statements are predictions, projections and other statements about future events that are based on current expectations and assumptions and, as a result, are subject to risks and uncertainties. These statements are based on various assumptions, whether or not identified in this press release. These forward-looking statements are provided for illustrative purposes only and are not intended to serve, and must not be relied on by an investor as, a guarantee, an assurance, a prediction or a definitive statement of fact or probability. Actual events and circumstances are difficult or impossible to predict and will differ from assumptions. Many actual events and circumstances are beyond the control of Satellogic. Many factors could cause actual future events to differ materially from the forward-looking statements in this press release. You should carefully consider the risks and uncertainties described in the "Risk Factors" section of Satellogic's Annual Report on Form 10-K and other documents filed or to be filed by Satellogic from time to time with the Securities and Exchange Commission. Forward-looking statements speak only as of the date they are made. Readers are cautioned not to put undue reliance on forward-looking statements, and Satellogic assumes no obligation and does not intend to update or revise these forward-looking statements, whether as a result of new information, future events, or otherwise. Satellogic can give no assurance that it will achieve its expectations.
